

ABSTRACT OF THE DISCLOSURE

COLLOIDAL DISPERSION OF A RARE EARTH COMPOUND  
COMPRISING AN ANTI-OXIDANT AGENT AND USE THEREOF AS  
5 ADDITIVE FOR DIESEL FUEL FOR INTERNAL COMBUSTION  
ENGINES

The invention relates to a dispersion of the type  
comprising particles of a rare earth compound,  
10 particularly a compound of cerium, an acid and an  
organic phase, characterised in further comprising an  
anti-oxidant agent which can particularly be selected  
from substituted derivatives of phenol, aromatic amines  
or tocopherols. Said dispersion may be used as additive  
15 for diesel fuel for internal combustion engines, in  
particular as additive for diesel for diesel engines.;
